

Solvent Solutions

20 Years of R&D = Hundreds of Solvent Solutions

InKemia Green Chemicals has developed the world's largest greener and safer solvent library containing hundreds of solvent solutions. We can work with you to address your challenges related to solvent performance.

What We Offer

Through our Innovative Research and Development Process:

We Can

identify an alternative green solvent for you that allows for enhanced performance.

We Can

integrate an alternative solvent into a commercial product or process.

We Have

a history of success in providing solvent solutions for our customers. A small selection of examples include:

We have developed a renewable, safer, and environmentally friendly solvent replacement for DMF in the synthesis of an anticancer agent.

We have integrated one of our green solvents as a component of herbicide-based formulations.

We have replaced a toxic solvent with a green solvent of equivalent performance for metal degreasing applications.

We have provided an alternative green solvent of equivalent performance for paints and coatings.

See more examples on our website!

Find out how we can be of service to your company.
