

# GRAFFITI REMOVER

## CARDINALTECH · FROM IDEAS TO INNOVATION

We investigate and develop technological projects with a flexible and multidisciplinary team, applying our knowledge in different fields, to solve current and future challenges through novel technologies.

### NOVEL TECHNOLOGY

A user and environmentally friendly chemical formulation based on a proprietary development that separates paint particles from the original surface without damaging it.

### CHARACTERISTICS

- High effective
- Removes graffiti, shadows and marker pens
- Works on dry and wet surfaces
- No pre or after treatment
- User friendly
- Environmentally friendly
- Biodegradable
- Non-toxic nor irritating
- No skin burns
- No caustic
- Non flammable
- No hazard nor precautionary label statements

### COMPETITIVE ADVANTAGES

- ✓ The same formula works on multiple surfaces, including both smooth and rough surfaces, without damaging them.
- ✓ It works with just water and a cloth or pressured water.
- ✓ Its performance is not affected by wet surfaces.
- ✓ It doesn't require the use of specific safety equipment such as gloves or a mask.
- ✓ It's safe for the environment. It can be certified as an ecofriendly product.

### DEVELOPMENT MATURITY

The performance has been successfully tested in the following surfaces: Glass, Fiberglass, Plastics, Vinyl, Aluminum, Metal, Stainless steel, Wood, Natural stone, Brick, Cinder Block, Stone Block, Marble, Tile, Glazed ceramic, Porcelain stoneware, Concrete.

Different products with the same technological base are available, in order to meet different market needs:

- Liquid Remover: an all-in-one product for all surfaces and types of paint.
- Gel Remover: a specific product for big amounts of paint to avoid dripping.
- Liquid for Shadows: a specific product to remove shadows and residual paint.

The formulation can be adjusted to meet specific client needs in terms of compounds and product form.
